The Senior Director, Human Resource Manager
Jamaica Customs Agency
Kingston15
Jamaica, W.I.

I am writing to express interest in the Workstation Technician (Level 5) position at the Jamaica Customs Agency. With a Bachelor's degree in Computer Systems Engineering and two years of professional ICT experience, I possess the technical discipline required to maintain and troubleshoot workstations and other ICT infrastructure.

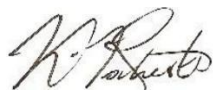

In my current role, I provide first-level support, resolving hardware, software, and connectivity issues to ensure system availability. I am proficient in the deployment, installation, and maintenance of desktops and laptops, including imaging and re-imaging machines using deployment tools. My technical background includes diagnosing component failures in RAM, storage, and power systems, as well as performing routine patches to ensure a compliant IT environment.

I am well-versed in inventory management and the procurement of consumables to maintain resource availability. Furthermore, I manage user accounts and security policies via Entra ID, ensuring strict adherence to endpoint protection. Beyond workstations, I have hands-on experience in networking, including the installation of switches, access points, and IP phones, and I am capable of simplifying technical terminology for non-technical users during training.

I am accustomed to fast-paced environments and I am fully prepared to meet the demands of the role, including after-hours support and attending to any concerns or proceedings if required. I look forward to discussing how my commitment to integrity and technical excellence can contribute to the JCA.

Thank you for your consideration.

Best regards,

Kervanni Rochester (Mr.)
